LAB 8: STATE TRANSITION DIAGRAM - ORDER LIFECYCLE

Submitted by: Sparsh Tyagi, Vaishnavi Rajawat, Shubham Patel, Varnit Tomar **Faculty Mentor:** Mr. Rishabh Rathore Sir

AIM

To draw the UML State Transition Diagram modeling the full lifecycle states of an order, from placement to completion or refund.

STATE TRANSITION TABLE

Current State	Triggering Event / Condition	Next State	Action Taken
Placed	Payment Authorization Success	**Confirmed**	Lock Inventory
Confirmed	Vendor Accepts Order	**Processing**	Print Pack Label
Processing	Courier Dispatch & Waybill Added	**Shipped**	Send Tracking Email
Shipped	Customer Receipt Signature	**Delivered**	Settle Ledger
Confirmed / Processing	Cancellation Request Approved	**Cancelled**	Restore Inventory
Delivered	Return Validated by Admin/Vendor	**Refunded**	Initiate Gateway Refund

STATE TRANSITION DIAGRAM

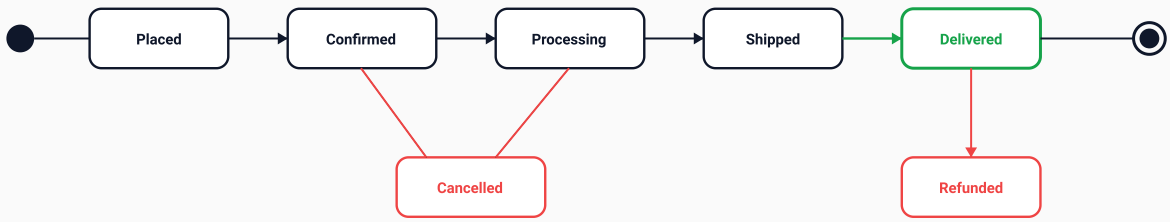

FIGURE 8.1: STATE TRANSITION DIAGRAM FOR ORDER LIFECYCLE

CONCLUSION

The State Transition Diagram models the complete state machine governing an order, establishing valid state paths for fulfilment, cancellations, and return refunds.
